

We rebalance our Investment Model Portfolios periodically, to ensure that they continue to perform optimally for you. This may cause a change in the Ongoing Charges Figure, or OCF, which is dependent on the cost of the underlying funds.

To help you understand how changes may affect the charges you pay, the table below shows the cost at the previous rebalance, compared to the current rebalance.

Ongoing fund charges vary between platforms and the figures above are based on the highest charge we are currently aware of. OCFs are calculated on the cost of the underlying funds and do not include any further transaction costs incurred by the funds held, or any performance fees that may be levied by them. Platform and adviser fees apply in addition to these charges, and remain unaltered.
